MUHAMMAD HUSSAIN

emirates.hussain67345@gmail.com : 0342259378 9 Karachi, Pakistan

SUMMARY

Motivated computer science student with a strong foundation in programming, problem solving and software development. Skilled in Python with hands-on experience from academic project such as AI-powered attendance systems and deep learning application. Eager to apply technical knowledge in real world environments, contribute to team success, and gain industry experience through an internship.

PROJECTS:

CamTend 2025 – 2026

FYP Using Python & AI

Designing an AI-powered classroom attendance system using facial recognition through low resolution camera input, leveraging real-time image processing and deep learning techniques. Developing a face recognition pipeline to map facial features to student identities, with optimized accuracy through feature extraction and low-light enhancement strategies

Finance Manager 2024 – 2024

Python and AI, Fifth Semester 2024

Developed a powerful finance management system integrating AI to analyze spending habits, track expenses, and provide actionable financial insights for smarter budgeting and decision-making.

Word Guessing Game 2023 – 2023

C programming, Second Semester 2023

Developed a dynamic word-guessing game in C++ with a diverse word selection system, showcasing strong programming logic and engaging gameplay design.

Visualization Of Data-Structure 2023 – 2023

JavaFX & OOP, Third Semester 2023

Implemented a visually engaging data structure queue project using JavaFX, showcasing proficiency in Java programming and UI design principles.

SKILLS

- Python(Numpy,Pandas,Matplotlib,Skitlearn,Opencv,Pytorch,TensorFlow,Data Visualization)
- HTML/CSS /JavaScript
- Artificial Intelligence
- SQL
- PowerBI

EDUCATION: 2022 – 2026

Bachelor of Science in Computer Science

Iqra University, Main Campus

- Relevant Coursework: Deep learning,Software engineering,Routing and switching,Software project management, Data structures and algorithms, discrete structures, object-oriented programming, compiler construction, linear algebra and differential equations, multivariable calculus.
- CGPA: 3.1

CERTIFICATES

- Basics Of Python
- Artificial Intelligence and Machine learning
- Prompt Engineering For Developers
